

ACT Gateway

If you register to take the ACT on a weekend you will need to install the ACT Gateway application. You can install ACT Gateway from the Company Portal App on your computer.

The Company Portal can be found under the Start Menu either by searching or alphabetically under All Apps

On the left bar is a tab named Apps. ACT Gateway should be the first app listed on the apps page. Select the ACT Gateway tile, then click install.

Once the installation is finished the app can be found under the Start menu.

- If you have issues with the installation, your device doesn't have the Company Portal app, or the Company Portal app says, "This device is already assigned to someone..." please submit a Help Ticket with the Help Topic "Software Installation Needed."
